

LISTEN

89.7 fm KFJC

SUNDAY

12:AM - 3:AM
OFF THE RECORD.
with JAPANIC

Nerve-controlled activity in the complex animal: present at birth, unconscious, automatic. The synapse highway of night @ 250 miles an hour; impulse on axon, handprints on vinyl outside the turntable theatre.

3:AM - 7:AM
GERMINAL VARIATIONS

Differentiation as a result of genetic mutation; favorable inheritance as a basis of natural selection. The wing, flipper, arm and videlicet of comparative anatomy

7:AM - 10:AM
EVOLUTIONARY EVIDENCE

Ontogeny echoing phylogeny; the stages of single cell, blastula, gastrula, then gill and finally hair. Spinning the record of the rocks and the rocks of the record in an attempt to establish common ancestry

10:AM - 1:PM
with UNCLE AL

Musical phobias probed in the treatment of neurotic conditions and camp-style maladies with the power of sober disorientation. Darwin, De Sade and the Mothers of Invention

1:PM - 4:PM

GLANDS OF INTERNAL SECRETION

Ductless dissemination designed to stimulate otherwise circulatory stagnation through secretion regulation, thereby preventing unwanted excess (giantism) or undersecretion (dwarfism) in the growth hormone of the pituitary

4:PM - 7:PM

JAH'S MUSIC

with SPLIFF SKANKIN'

Discovery and usage of the reggae antitoxin, the dub antibody and the agglutinin of spiritual celebration for treatment of imperial globalization, other bacteria that threaten the soul. Begin at the Road Block of Marley, proceed to the immunity of Jah's Music Calendar for further purification as needed.

7:PM - 10:PM

ONE STEP BEYOND

with DAVE EMORY

Investigation into sociopolitical breeding practices, applied transnational genetics, artificial epidemics of negative prognosis and hybrid media collusion. Dare to question rigidity of selection and desirability of conforming traits as defined by the power elite

10:PM - 2:AM

JAZZADELICA

with ROCKY ROCOCO

The dysynaptic, ipsilateral, intersegmental dance; a sequence of sensory receptors stimulating the afferent neuron, spinal, alpha motor units and voluntary muscles reacting to fastidious dosage in sufficient strength to compel the most positive of tropisms: automatic response

MONDAY

2:AM - 6:AM
VESTIGIAL REMAINS

An inheritance of acquired characters, passed on through countless generations. The cleavage divisions of eggs following fertilization, known more commonly as embryonic development

6:AM - 10:AM
RITUAL OF RA
with ANUBIS

Gross anatomy predicated on the return of departed souls. ANUBIS descends to safeguard the inviolate remains of the pharaohs: dealing death to unbelievers, eternal life to his listeners. Soaking organs, cavities of spice; shroud of linen, coffins within coffins within

10:AM - 2:PM
MONDAY BEATDOWN
with SPIDERMAN

Essential organs of reproduction the stylus and the groove; pollination, conjugation, fertilization and erstwhile germination. Fuse finds nuclei during the chromosome rap restoration, from diploid hip to haploid hop. The cell division of mitosis, classic soul, beats and super-villain attrition

2:PM - 6:PM
APARTMENT LIFE
with MITCH LEMAY

The Popliteus muscle arises from the lateral condyle of the femur, fitting the posterior surface of the tibia. Forming the hollow behind the knee, it rotates the tibia medially, unlocking flexion for peroneus longus

6:PM - 7:PM
THOUGHTLINE

with ROBERT EMMETT

Issues of the day draw on the complexity of the brain and its integrating areas; the capacity for creativity, prediction and abstract reason back mankind's primary claim to superiority among living organisms

7:PM - 10:PM
BEYOND ROOM 222
with PETE DIXON

Vibrations enroute through the scala vestibuli, through the small opening at the apex of the cochlea leading into the scala tympani, descending to the cochlear base where they expend themselves against the secondary membrane of the fenestra

10:PM - 2:AM

THE LISTENER'S DIGEST

with THURSTON HUNGER

Through the Alimentary Canal, basic to life and musical nourishment. Steady muscular peristalsis (in wave-like contractions), the chew, grind and crush; pepsin in gastric juice activated in presence of hydrochloric acid, followed by mucus, pylorus and chyme. Emulsification in secretin.

TUESDAY

2:AM - 6:AM
ENDOCRINE GLAM

Indiscriminately broadcast hormones, transported to all parts of the body and therefore ambiguous as to exact function. The double nature of the suprarenal glam both in phylogeny and ontogeny best described as retroperitoneal. The goldmine darkest just before the dawn

6:AM - 10:AM

with PIERCE PAYNE

Not a style but a procedure, incorporating different sonorities, tape speeds, volumes, textures and densities. The studio as instrument

10:AM - 2:PM
OUT BEHIND THE BARN
with PEGGY-O

The capacity of genes to mutate as the key to evolution; the dominant, the recessive, the pollinated and the pure. Roses are red, grasses are blue.

2:PM - 6:PM
THE FREE CLINIC
with REJECT GIRL

Additional defense against microorganisms of conformity include quarantine, use of ultraviolet light, boiling, dehydration, pressure cooking, food inspection and the side-chain theory of Ehrlich

6:PM - 7:PM
FROM THE VAULT

At the cephalic end of the primitive streak is a thickened mass of cells - the node. Producing mesoderm, it pushes forward past the ectoderm in what is known as the head process, or live performance/interview feature

7:PM - 10:PM
TOO COOL FOR SCHOOL
with CYNTHIA LOMBARD

Extensive folding noted in exploratory examination of cerebral hemispheres, most conspicuously apparent in the blinding glow of olfactory bulb-light

10:PM - 2:AM
THE STILLS OF DISTINCTION
with JACK SOIL

Sounds stilled and distilled from various locations throughout the new world odor. The reaction of various yeast cultures and their interactions with sonic sugars examined, combined, sampled. Sources include public library w/c's, nursery school nap sites, and ramshackled outhouse walls

WEDNESDAY

2:AM - 6:AM
PARS INTERMEDIA

The portion of adenohypophysis between the pars distalis and advanced neurohypophysis; connecting the anterior and posterior lobes

6:AM - 10:AM
DANCIN' IN THE FAST LANE
with ANN ARBOR

Producing the hormone epinephrine, stimulating the thoracolumbar nervous system and inducing heart acceleration, vessel constriction and a noted rise in blood pressure

10:AM - 2:PM
LUBBOCK OR LEAVE IT
lwith JOE ED

Fossil history of the horse: ancient ancestor, Eohippus, no bigger than a fox. Modern equivalent, Equus, is one-toed, eats hay, and is large enough for Joe Ed to ride

2:PM - 5:PM
ROCKS OFF THE ROOF +
PSYCHEDELIC PUNKS ROTISSERIE

As the lungs enlarge pressure drops within, causing outside air to fill the partial vacuum (inspiration); relaxing reduces the thorax cavities, there is elastic recoil and air is forced out (Expiration)

5:PM - 6:PM
THE PIRATE HOUR

with CAPTAIN JACK & SKULLY

From the median longitudinal voyages of erstwhile buccaneers in the endoderm of the gut just caudal to the pharyngeal pouches

6:PM - 7:PM
SPORTS MIDDLE
with KEVIN O'DANTE & GUS LIGNOS

Structure with semipermeable action and careful selection of substances, centering on competitive feat and other wonderments of the human body

7:PM - 10:PM
RECORD ROUND-UP
with OSCAR HOX

Enclosing the wayward coils and spoils of the small intestine with the four cow-punchers. Ascending, Transverse, Descending and Sigmoid along the Red River Colon

10:PM - 2:AM
CLUB MANIC CONSCIOUSNESS
with ANGEL D. MONIQUE

Dream and wait through endless twilights until the shadowy solitude stirs a longing for light so frantic, as to lift entreating hands to the single black ruined tower reaching far above the forest into the unknown outer sky

THURSDAY

2:AM - 6:AM
SPLENIUS CERVICIS

Spinous processes employing miniscule delay; device and technique. One instrument or many? What reverberation they make

6:AM - 10:AM
THURSDAY MORNING SOUNDTRACK
with DAVE SAXON

Comparing the pectoral and pelvic girdles as to strength, function and versatility of action, one is struck by the traditional 12-bar sequence employing only those three chords on the first, fourth and fifth notes of the scale

10:AM - 2:PM
THE JAZZ PARADE
with DAVE RICHOUX

Sound itself as theme and content, from the external acoustic meatus past the funnel of the auricle inward to the tympanic membrane; improvisation, variational pitch, flexible vibrato and glissandi unusual

2:PM - 6:PM
CHAPEL PERILOUS
with ELLIS DEE

Nourishment by diffusion from the capillaries at the junction of the corneal and conjunctival epithelium, analogous to the pia-arachnoid of the brain and essential to the photopic and discriminative

6:PM - 7:PM
ONE STEP BEYOND ANNEX
with DAVE EMORY

The Bretton Woods metastasis circulated through lymph and myth; from America's utile dulci Post-War bedfellows to World Trade uber alles. Warlords, military metaphysics & the rationale of exoskeletal national peril

7:PM - 10:PM
ZONA PELLUCIDA

Melodic medullated membrane of transparent, semigelatinous substance; the cells of which were probably formed by a union of two gametes during a night of forgettable coupling

10:PM - 2:AM
RADIO FREE HATRED
with MR. HATE

Umbrage and acrimony gaseous and liquid; the hymns of hate are many. From nose and mouth and ureters do they pore. Nitrogenous enmity, carbon dioxide estrangement and rage convulsed

FRIDAY

2:AM - 6:AM
THE ORAL GROOVE

Sometimes paramecium, other times protozoan. Note: some biologists compare the contractile vacuoles to pumps which keep going as the time. At KFJC, we don't like to compare. But we keep going all the time

6:AM - 10:AM
FRACTURED FAIRY TAILS
with ROCKET J. SQUIRREL

Crystalline lens (for elastic accommodation); aqueous humor (hypermetropic alkaline); vitreous body (mostly water) in the service of Refracted Media and Fractured Fridays

10:AM - 2:PM
THE BLUES BAR
with JOHN GOLDFARB

Capillary blues beds maintaining constancy of the internal environment; all organs of the circulatory system exchange materials through the walls of these vessels, whether urban, electric, rural, traditional or jump

2:PM - 6:PM
WHAT IS GRAWER?
with GRAWER

Any closed space serving as a reservoir, especially one of the enlarged sub-arachnoid spaces, above which is a covering passing over the sulci that finds entrance among the transverse cerebral fissures

6:PM - 7:PM
SEZ WHO NEWS
with CHALKY WHITE & TEAM

Areas of olfactory sense, topics of sustained interest exposing sensory nerves and the oftentimes optic chiasma of official credibility

7:PM - 10:PM
GIRL VERSION
with MAYBELLINE

The low threshold of chemoreceptor, how responsive? Musk in dilutions of one part in eight million; one part of quinine in two million parts of water. Powers of scent, demonstrable taste

10:PM - 2:AM
EPILEPTIC WAISTCOAT
with DORIAN GRAY

First-order neurons enter the spinal cord and pass to the medial part of the posterior Gray column, where they synapse with the origin cells of the second-order neurons; one of many efferent pathways in life

SATURDAY

2:AM - 6:AM
ISLETS OF LANGERHANS

That a diverticulum should give rise to cells so different from those producing digestive enzymes is amazing only to those who have not been deeply indoctrinated into the ways of living things

6:AM - 9:AM
PV'S PLAYHOUSE
with PANDORA VOX

In most plants and animals there is no definite number of ska cells for a given species, although there are some notable exceptions, such as Pandorina morum, who has regularly 8 to 800 for her regular report

9:AM - 12:PM
NORMAN BATES
MEMORIAL SOUNDTRACK SHOW
with ROBERT EMMETT

The internal ear consists of two labyrinths, the osseous (television & radio) and the membranous (stage & cinema), as well as a number of other chambers and canals which contain advertising slogans, product pitches, fond memories, other novelties first heard as visual accompaniment

12:PM - 3:PM
BREAK ON THROUGH
with MONKEY PUNCH

In divergence, one neuron synapses with two or more neurons and thus can bring about different responses if the initial stimulus is of sufficient strength and duration

3:PM - 6:PM
THE BIG GUITAR SHOW
with MYKE DESTINY

The story of Modern Man extends from Cro-Magnon Man (a European ancestor) to Rockabilly Man, who evolved in Memphis on (or near) the SUN record label and first demonstrated the genetic shuffling of white country with black blues & gospel; modern exponents continue to this day

6:PM - 9:PM PHIL'S GARAGE + SURF'S UP!
With PHIL DIRT

Thriving on the time interval between original sound and its reflection back from a natural or electronic barrier, this manner of echo helps exploit the space between recording and playback. Bowwowowowowowowow

9:PM - 12:AM
NO WAY OUT
with ZERO GRAVITY

The back-pressure-arm-lift method places rescuer at a kneeling position near victim's head, rocking back and raising victim's arms until tension is felt at the shoulders; repeating every five seconds. Prompt application is the best guarantee of success

SUNDAY

12:AM - 3:AM
OFF THE RECORD.
with JAPANIC

Nerve-controlled activity in the complex animal; present at birth, unconscious, automatic. The synapse highway of night @ 250 miles an hour; impulse on axon, handprints on vinyl outside the turntable theatre.

3:AM - 7:AM
GERMINAL VARIATIONS

Differentiation as a result of genetic mutation; favorable inheritance as a basis of natural selection. The wing, flipper, arm and videlicet of comparative anatomy

7:AM - 10:AM
EVOLUTIONARY EVIDENCE

Ontogeny echoing phylogeny; the stages of single cell, blastula, gastrula, then gill and finally hair. Spinning the record of the rocks and the rocks of the record in an attempt to establish common ancestry

10:AM - 1:PM
with UNCLE AL

Musical phobias probed in the treatment of neurotic conditions and camp-style maladies with the power of sober disorientation. Darwin, De Sade and the Mothers of Invention

1:PM - 4:PM

GLANDS OF INTERNAL SECRETION
Ductless dissemination designed to stimulate otherwise circulatory stagnation through secretion regulation, thereby preventing unwanted excess (giantism) or undersecretion (dwarfism) in the growth hormone of the pituitary

4:PM - 7:PM
JAH'S MUSIC

Discovery and usage of the reggae antitoxin, the dub antibody and the agglutinin of spiritual celebration for treatment of imperial globalization, other bacteria that threaten the soul. Begin at the Road Block of Marley, proceed to the immunity of Jah's Music Calendar for further purification as needed.

7:PM - 10:PM

ONE STEP BEYOND
with DAVE EMORY

Investigation into sociopolitical breeding practices, applied transnational genetics, artificial epidemics of negative prognosis and hybrid media collusion. Dare to question rigidity of selection and desirability of conforming traits as defined by the power elite

10:PM - 2:AM
JAZZADELICA

with ROCKY ROCOCO
The dysynaptic, ipsilateral, intersegmental dance; a sequence of sensory receptors stimulating the afferent neuron, spinal, alpha motor units and voluntary muscles reacting to fastidious dosage in sufficient strength to compel the most positive of tropisms: automatic response

MONDAY

2:AM - 6:AM
VESTIGIAL REMAINS

An inheritance of acquired characters, passed on through countless generations. The cleavage divisions of eggs following fertilization, known more commonly as embryonic development

6:AM - 10:AM
RITUAL OF RA
with ANUBIS

Gross anatomy predicated on the return of departed souls. ANUBIS descends to safeguard the inviolate remains of the pharaohs: dealing death to unbelievers, eternal life to his listeners. Soaking organs, cavities of spice; shroud of linen, coffins within coffins within

10:AM - 2:PM
MONDAY BEATDOWN
with SPIDERMAN

Essential organs of reproduction the stylus and the groove; pollination, conjugation, fertilization and erstwhile germination. Fuse finds nuclei during the chromosome rap restoration, from diploid hip to haploid hop. The cell division of mitosis, classic soul, beats and super-villain attrition

2:PM - 6:PM
APARTMENT LIFE
with MITCH LEMAY

The Popliteus muscle arises from the lateral condyle of the femur, fitting the posterior surface of the tibia. Forming the hollow behind the knee, it rotates the tibia medially, unlocking flexion for peroneus longus

6:PM - 7:PM
THOUGHTLINE
with ROBERT EMMETT
